The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest the use of an imaging system configured to compensate for one or more individual defective pixels in an array of pixel elements, wherein a controller is configured to generate pixel addresses of at least three subsets of pixels within a block and a bad pixel detection and correction unit configured to determine the subset with the minimum variance, calculate a median of each subset, determine whether a value of the center pixel exceeds the medians of the subsets, and to replace the value of the center pixel with the median of the subset with the minimum variance if the value of the center pixel exceeds the medians of the subsets.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
